PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 2.5 years of hands-on experience building scalable, production-grade web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Deep expertise in cloud-native architecture (AWS S3, Lambda), enterprise authentication (JWT, OAuth 2.0, OIDC, PKCE), AI-powered workflow automation, asynchronous messaging (RabbitMQ), and multi-tenant SaaS design. Proven ability to deliver high-performance systems with measurable impact across recruiter-facing, candidate-facing, and admin-facing product surfaces.

EXPERIENCE

Full Stack Developer | Kavish Technology Pvt Ltd | Remote, Jaipur

Jan 2024 – Present

- Architected and delivered **Employsr**, an AI-powered, multi-tenant recruitment SaaS platform (React.js, Node.js, MongoDB, TypeScript) supporting three distinct job types: **Normal**, **Pre-screening**, and **Hiring Pipeline**, with role-specific portals for Recruiters, Candidates, Organizations, and Admins.
- Built an **AI-driven pre-screening interview engine** where candidates complete recorded video interviews; sessions are stored on **AWS S3** via unique session IDs, with **AWS Lambda** functions triggering automated AI video analysis pipelines to generate structured evaluation scorecards and weakness feedback reports.
- Engineered an **AI-based candidate-job matching system** with percentage fit scoring, NLP-powered resume parsing, geo-proximity candidate search, and a **Talent Outreach** module that surfaces ranked candidate recommendations from job description inputs.
- Integrated **Google Meet** and **Microsoft Teams** APIs for in-platform interview scheduling; built organization-level interview monitoring dashboards and a recruiter availability management module, eliminating manual coordination overhead.
- Designed and implemented a **multi-tenant SSO system** using OIDC, JWT, PKCE, and JWKS with per-organization GCP credential configuration; built a **Super Admin Portal** with dynamic database connection switching for strict per-tenant data isolation and RBAC across Super Admin, Admin, and Marketing roles.
- Developed a **bulk user provisioning pipeline** using **RabbitMQ** message queues; implemented dynamic PDF generation with automated email delivery, and integrated **WhatsApp Business API** for promotional and lead-nurturing campaigns.
- Built a **cron-based job notification system** for personalized job match alerts and implemented a **user activity tracking and anomaly detection module** with session monitoring, suspicious login flagging, and secure authentication audit logs.
- Optimized backend performance via **Redis caching** and MongoDB compound indexing, reducing critical API response times by **40%+**; integrated **Cashfree Payment Gateway** with HMAC-SHA256 webhook verification, idempotency controls, and dynamic enterprise pricing plans.

PROJECTS

JobMailer — React.js · Node.js · Express.js · MongoDB · JWT

- Full-stack email automation platform with bulk scheduling, personalized workflows, template management, JWT-secured REST APIs with RBAC, and a real-time analytics dashboard.

Podcast App — React.js · Redux Toolkit · Firebase · HTML5 · CSS3

- Feature-rich podcast streaming app with Firebase authentication, audio/image storage, Firestore real-time DB, episode management, subscriptions, and global state across 15+ components.

SDE Portfolio — React.js · JavaScript · CSS3 · Git

- Modular developer portfolio with data-driven project rendering, a custom templating system for non-technical content updates, and a **95+ Lighthouse** performance score.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript

Frontend: React.js, Redux Toolkit, HTML5, CSS3, Material-UI, Responsive Design

Backend: Node.js, Express.js, REST APIs, GraphQL, WebSockets, RabbitMQ

Databases: MongoDB, Prisma ORM, Firebase Firestore, Redis

Cloud & DevOps: AWS S3, AWS Lambda, Docker, CI/CD, Firebase, Git, GitHub, Postman, JIRA

Auth & Security: JWT, OAuth 2.0, OIDC, PKCE, JWKS, RBAC, HMAC-SHA256

Integrations: Google Meet API, Microsoft Teams API, WhatsApp Business API, Cashfree Payment Gateway

Core Concepts: Data Structures & Algorithms, System Design, OOP, MVC, Multi-tenant SaaS, State Management

EDUCATION

Kota University

2018 – 2022

B.Sc (Percentage: 75%) — Data Structures, Algorithms, OOP

RBSE Board

2018

Senior Secondary (Computer Science) — Programming Fundamentals & Computer Systems

CERTIFICATIONS

- Full-Stack Development Certification (AccioJob)
